Curriculum Vitae - updated September 2024

"The true difference between languages is not in what may or may not be expressed but in what must or must not be conveyed by the speaker" - R.Jakobson

Introduction

My name in Vietnamese is "Cao Thành Việt". I am a sixth-year PhD candidate at the Graduate Institute of Linguistics, National Tsing Hua University, Taiwan, under the supervision of Prof. I-Ta Chris Hsieh. Before that, I got both B.A. and M.A. in Linguistics from the Faculty of Linguistics, University of Social Sciences and Humanities, Vietnam National University (VNU, Hanoi). My main research interests include semantics, pragmatics, and syntax of classifier languages in light of formal approaches, i.e. model-theoretical semantics and comparative syntax in generative grammar. Currently, I am working on my PhD thesis concerning universal quantification and plurality in Vietnamese. Besides, language contact among MSEA languages from historical phonology/grammar aspects always attracts my attention.
